

-The Role and Future of Social Welfare Practitioners during a Global Crisis-

Japanese and English consecutive interpretation available

The COVID-19 pandemic, the war in Ukraine, as well as the economic instability that follows these, are threatening the lives of people and shaking the foundations of their livelihoods in all countries around the world. This seminar examines what social welfare and social work in particular can do to support the lives of people in this complicated era of crisis.

With a focus on child welfare and rights advocacy specifically, the seminar aims to share about recent measures and challenges in each participating country and to consider the future of Asian social work in the field of child and family welfare.
